DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 4, the term “potentially most powerful” in phrase “the potentially most power output wavelength” is vague and unclear. It is unclear because the term leaves the Examiner in doubt as to the meaning of features to which it refers thereby rendering the claim indefinite. The Examiner suggests changed the term to “the output wavelength for which the Raman gain is maximal as defined in 11 lines 22-23 of the specification.

The deficiency is found in claims 8 and 9, which requires the same correction.

Claim 8 is rejected because it is unclear. Claim 8 is an apparatus (device) claim without any means except a device in preamble. The device is defined by special steps for adjusting some output wavelengths in an order. It is unclear what claim category the claim is since the apparatus claim contains only features as steps, no apparatus is defined in the claim.

Claims 2-7 are rejected because of their dependencies.
